

Ridge View Family Pets Health & Purchase Guarantee

Ridge View Family Pets certifies that the puppy that you adopted is in sound health at the time of adoption to the best of our knowledge.

The puppy has been given all vaccinations and wormings stated on the vaccination records provided to the buyer.

The buyer has seven days to have their licensed vet complete an initial health check. If a genetic or life-threatening disease is found, we require a signed document from your vet stating the illness. We will exchange the puppy for a puppy of equal value. Ridge View Family Pets is not responsible for any vet bills.

Replacements or money back are not available for puppies with parasites or other common illnesses that may develop during the process of moving the puppy from our home to yours.

Ridge View Family Pets offers a 30-day general health and 6-month genetic health guarantee that applies to the original buyer only.
